

PUT SOME COLOR IN YOUR DATA CENTER!

Color Cassettes are new to the industry, but there are so many applications to use them.

For an Organized Data Center

- Easily identify one network from another
- Keeps networks separated via color coded system
- Easy for installers to install
- In SAN application, create A & B sides for your network
- Can be used with colored boots on trunk cables for ease of identification & installation
- Hermetically sealed to alleviate cardboard dust in the data center

All Cassettes are labeled:

- Method of Pinning
- Type of Fiber
- Part # and Description
- Serialized
- Test Results on back of each cassette

Cassettes can be ordered with shuttered or non shuttered adapters.
